

Low-Level Carbon Monoxide "Health" Monitor Model 1070

This product is an EXTREMELY ACCURATE, Low Level CARBON MONOXIDE MONITOR that will detect carbon monoxide from ANY SOURCE accurately down to 10 ppm (parts per million).

"Unintentional carbon monoxide (CO) poisoning causes approximately 2100 deaths in the United States per year, but the use of CO detectors could potentially prevent many of these deaths."

The Journal of the American Medical Assn.

Carbon Monoxide Poisoning Symptoms

"At low concentrations, fatigue in healthy people and chest pain in people with heart disease. At higher concentrations, impaired vision and coordination; headaches; dizziness; confusion; nausea. Can cause flu-like symptoms that clear up after leaving home. Fatal at very high concentrations. Acute effects are due to the formation of carboxyhemoglobin in the blood, which inhibits oxygen intake. At moderate concentrations, angina, impaired vision, and reduced brain function may result. At higher concentrations, CO exposure can be fatal!"

*U.S Environmental Protection Agency

What The Experts Say

"Each year unintentional carbon monoxide (CO) poisoning is estimated to cause approximately 2100 deaths in the United States. Efforts to educate the public on how to prevent CO poisoning have focused mainly on increasing awareness of the dangers of CO and on promoting the proper maintenance of potential sources of CO, such as furnaces and water heaters."

*The Journal of the American Medical Association
Volume 279 Number 9*

Compared to over-the-counter CO detectors that start measuring at 30 ppm, this CO monitor will read accurately down to 10 ppm providing a substantial increase in the protection of your family from low level carbon monoxide poisoning. It will display constant readings from 10 ppm to 70 ppm, and a "HI" level (over 70 ppm) plus update the visual reading every 10 seconds. Many other carbon monoxide alarms only sample the air every 2.5 minutes, allowing high levels of CO to circulate through your home before you know it.

Don't put your family in harms way. Protect them with a high quality, extremely accurate low level carbon monoxide monitor for your home. Give us a call or talk to your technician and we will show you why the CO Experts Model 1070 is the carbon monoxide monitor you want to have in your home.
